PROFESSIONAL EXPERIENCE

Self-Employed Web Designer & Developer | 04.2025 – present
WebCentar

- Designed and developed custom, responsive websites using WordPress, delivering modern and optimized solutions for businesses and individuals.
- Managed end-to-end web projects, including client communication, UI/UX design, development, deployment, and maintenance.
- Implemented SEO and performance optimization strategies, improving client's online visibility and user engagement.
- Maintained long-term client relationships, resulting in repeat business and referrals.
- Delivered successful projects for various industries, such as: webcentar.ba, procjena.ba, pitaboom.com, growth-oasis.com, discoverlivno.com, bsc-atrium.com, etc.

Quality Assurance Tester – ZIRA TALENT ACADEMY | 10.2025 – 11.2025
ZIRA Group

- Performed Quality Assurance (QA) testing for web application, ensuring functionality, usability, and performance met company standards.
- Executed manual tests, identified bugs, and collaborated with developers to resolve issues efficiently.
- Participated in cross-functional team meetings, gaining hands on experience in software development workflows and QA best practices.
- Documented test cases and reported findings clearly, contributing to improved product quality and reliability.
- Gained hands-on experience working in an Agile environment and using Kanban boards to manage tasks and workflow effectively.

Frontend Developer (React.js) – QSD2024 Intership | 05.2025 – 06.2025
QSD (Quality Software Development)

- Participation in the development of modern web applications using React.js and modern JavaScript (ES6+) standards, with a focus on performance and code quality.
- Implementation of user interfaces based on UI/UX designs, working with reusable components, props, and state for a consistent user experience.
- Collaboration with senior developers on the development, testing, and improvement of existing features, including code reviews and team discussions.
- Working with REST APIs, efficient data handling, and a basic understanding of asynchronous operations and error handling.
- Learning and applying best practices for writing clean, maintainable, and scalable code, using Git for version control.
